### Hedman Elite Heddertubes offer extra heavy-duty construction for hard-use conditions.

Hedman Elite Heddertubes are made with ultra heavy-duty, 14-gauge steel tubing. They feature a bulletproof 3/8 in. flange and a thermal coating for intense heat conditions. Hedman Elite Heddertubes are designed to take the pounding and vibration of off-road conditions, as well as extreme hard use, the heat buildup found in motor homes during towing, and performance situations. Hedman Elite Heddertubes can take the abuse and keep on going when other brands fail.
