## 1968 Mustang California Special GT/CS, Classic Car, Muscle Car - \$23200

image 2 of 24

1968 Ford Mustang

fuel: gas

title status: clean

transmission: automatic

1968 Ford Mustang GT, California Special, Restomod - \$23,200  
I am selling my little 1968 Mustang California Special that I have enjoyed tremendously. This Mustang is very reliable, in great condition, makes people stop in their tracks, and has Tons and tons of new parts. Drives and handles amazing. I spent about a year and a half finding this car; I was lucky enough to find this one, and now someone else can enjoy. The only reason I am selling is we are finishing our basement as our kids are getting older, and I simply would like to have the cash to fund this project. I purchased this car 3 years ago from a gentlemen in Illinois. He purchased the car from a man in South Carolina, who was the one that did most of the work.

This is a clone GT/CS, however it has been done right, with a lot of additional nice touches that gives the car an even more aggressive stance, look and performance.

Here is information on the car, and I know I am forgetting some things:

### ENGINE / DRIVETRAIN

Completely rebuild 302 Winsdor V8 top to bottom, bored .30 over, with all of the following also new...

Comp Cam, with very nice lope; if you don't like the way this car sounds you do not have a pulse.

Aluminum Heads

Aluminum Roller Rocker Arms

Edelbrock RMP Performer Intake

QR Code Link to This Post

Demon double pumper Carburetor with electronic choke; 700 cfm??  
Petronix Electronic Ignition, with new distributor, hp coil, plugs and plug wires  
Hedman Shorty Headers  
Flow Master 40 Series Aluminum lifetime mufflers  
Dual 2 ½ mandrel aluminized exhaust, with h-pipe, and nice chrome tips at a tasteful length and positioning, sticking through the rear valance cut outs  
New Fuel pump, power steering pump and alternator, with new alternator and power steering brackets.  
Motor mounts  
Oversized aluminum radiator  
Fan  
Radiator overflow tank  
Belts, Hoses and Fuel lines  
Gas Tank and sending unit  
Aluminum fabricated valve covers, with breather.  
Nice old school chrome air breather with proper 302 badging  
Completely rebuilt 3 -speed automatic, with shift kit, and chrome pan. Shifts absolutely perfect at all speeds, loads, and rpm's.  
3:55 8.8" Rear End, w/ posi and 31 spline rear axles; its got some scat.  
Gas Tank and sending unit  
Engine bay is absolutely phenomenal. Entire engine bay was detail painted, in high gloss black.  
Motor runs very strong; have always ran full synthetic Mobil 1 10w/30.

#### NEW SUSPENSION , BRAKE PARTS, ETC.

Suspension has been lowered 1 inch; much better stance than factory IMO  
Scott Drake Gas shocks all the way around  
Oversized front sway bar with neoprene bushings  
Monte Carlo bar  
Chrome Export brace  
Chrome front shock mounts  
Control Freak oversized cross member  
Rear leaf springs  
Rear Traction Bars  
Ball Joints  
Front Shock towers  
Front coil springs  
Steering box and rag joint  
Greaseable Driveshaft U joints  
4 wheel Disc brake conversion, with nice oversized drilled and cross drilled rotors, with new wheel bearings  
Calipers, brake lines, and pads all the way around  
Dual resvoir Master cylinder  
GT500 Style 17 inch wheels, with spinners  
BF Goodrich GForce 45 Series TA Radials (225/45ZR17's), low profile; Wheel and tire combo is perfect on this car IMO

#### BODY / PAINT

Paint and stripes are in fantastic shape. Car shines up beautifully, as you can see in the pictures. The color seems to grab everyone's attention.  
The Carrol Shelby inspired side scoops, spoiler trunk lid, and the tail lights is what makes the look of this car IMO  
Body is completely solid with no rust. I am sure some of the fenders, etc. have been replaced over the years.

Underside is NOT undercoated so what you see is what you get.

Bright work in fantastic shape; wheel moldings, glass moldings, bumpers, mirrors, rocker moldings all good.

Some minor blemishes here and there on the paint/body (paint chips, small dings, etc.) as this is a driver, but all minor.

New blacked out front grill, with offset 3 bar Mustang logo. I put the logo on it just to personalize it a bit.

I also have grill mounted fog lights which I took off; I like the clean open grill; just my personal taste.

Trunk mat, and speckle sprayed trunk compartment with new jack set up; have spare tire in trunk.

#### INTERIOR

New seat foams and covers front and back. Seats look brand new.

Nice wooden and brushed aluminum GT steering wheel

Looks like new carpet but not for sure; carpet is excellent, with Mustang floor mats

Pedal rubbers

Headliner and sun visors are excellent

New rear seat belts

Gas gauge, Oil pressure gauge, and Temp gauge all work. Voltmeter and clock do not work. Have never troubleshot neither. None of the clocks work unless they are replaced from what I have been told.

Dash is in good shape; bezels are not tarnished, and everything has a nice sheen. Glove box area is perfect with no dings or scratches.

Has the nice center console, with the seatbelt stow away pockets, and center T-handle shifter.

After market Sun tachometer, tastefully mounted on steering column; can easily be removed if not wanted.

#### WHAT DOES NOT WORK

Heater motor does not work. I have never messed with it. All is there though. I have not worried about it since I drive it when it is not crazy cold out. I have driven it when it is 30 degrees out, and has not been an issue.

The horn button is currently unhooked. Horn needs a new contact assembly for the steering wheel center button. Scott Drake sells this kit, just have not gotten around to ordering and installing.

Voltmeter and Clock do not work, as previously mentioned.

Speedometer works great, however it reads 10 mph under. I have never taken the time to put the correct nylon speedo gear in the transmission, which is a simple driveway fix. When the previous owner changed the rear end to 3:55 he did not do this; for me has not big a big concern.

#### TO LOOK AT THE CAR

Before coming to look at the car, please make sure you are a serious buyer. If you have to ask permission to buy the car, please do so before coming.

No joy rides, tire kickers, scams or b.s.

Don't waste your time or mine with low ball offers please. This is not a must sell car.

This car is priced to sell and is at a very fair and reasonable price.
